Hiring Committee | Ferrovial Construction

Dear Hiring Manager,

I am writing to express my strong interest in the Civil Engineer Graduate 2025 position at Ferrovial Construction based in the UK. I recently completed my Master of Science in Civil and Environmental Engineering at the University of California, Berkeley, where I focused on transportation systems and infrastructure sustainability. Ferrovial's leadership in airport and highway construction and its commitment to innovation and sustainability align perfectly with my research and professional aspirations.

At Berkeley's Institute of Transportation Studies, I led a project analyzing the spatiotemporal distribution of emissions across sixty-six airports in California. I applied GIS, statistical modeling, and environmental justice frameworks to evaluate exposure impacts on surrounding communities and to propose strategies for sustainable airport operations. I also collaborated with CalTrans to assess airport safety zone accidents at 259 sites statewide, producing geospatial machine learning models that informed updates to safety guidelines. These experiences strengthened my technical foundation in transportation data analysis, risk evaluation, and environmental planning.

Beyond research, I have developed a practical and entrepreneurial mindset. As a product manager at Ditto, I led the design of GIS-driven accessibility systems and optimized location-based decision algorithms that improved service efficiency by more than forty percent. My ability to integrate engineering analysis with real-world applications reflects Ferrovial's values of excellence, innovation, and collaboration.

I am also very open to relocation. My partner is currently settled in London, and I am highly motivated to move to the United Kingdom to begin my professional career with Ferrovial Construction. The opportunity to contribute to Ferrovial's infrastructure projects while joining my partner in London would be both personally and professionally meaningful to me.

I am inspired by Ferrovial's vision of creating sustainable transport systems that connect communities worldwide. I would be honored to contribute to your team and to support the delivery of world-class airport and highway projects in the UK. Thank you for your time and consideration, and I look forward to the opportunity to discuss how my background and enthusiasm for sustainable infrastructure can add value to Ferrovial Construction's continued success.
